Aptar

Standard size	From 15 to 50 ml
Width	30 mm
Height	From 80 to 148 mm
Decoration Capabilities	Coloration, Silk-Screening, Hot Stamping, Lacquering/Varnishing
Main Material	PE

FEATURES & BENEFITS

Certified recyclability

- Mono-material full PE, improved recyclability
- Certified recyclability by the independent Institute CYCLOS-HTP (in Europe for uncolored packaging without decor or label)
- PCR capable (chemical and mechanical), food compliant

Airless protective technology

- Precise and buildable dosage
- Optimal formula protection with no external contamination (no air intake)
- High evacuation rate, 360° dispensing
- High performance, robust container and cap

TECHNICAL INFORMATION

- Top fill piston system
- Dosage 300 and 500 µl
- Available in matte or glossy finish
- Wide range of sizes and designs through Mix&Match available (SC actuator excepted)
- Many coloration and decoration (in progress) options

Please note that for each configuration, an express qualification needs to be done to ensure best performance. Duration of the tests between 6 to 8 weeks.
