Design and performance in one
versatile airless full packaging

stella

by Aptar

Standard size	15, 30 ,50 ml
Shape	Round
Dosage	150, 200 and 240 µl
Standard barrel finish	PP glossy or matte
Diameter	25 mm (15 ml), 30 (30 ml), 33 mm (50 ml)
Total height	99 mm (15 ml), 116 mm (30 ml), 144 mm (50 ml)
Fixture	CL 18 snap-on stepped or straight PP and metal
Piston position	Restitution, filling or airless (under vacuum filling)

FEATURES & BENEFITS

Excellent formula protection

- Fully airtight packaging, zero air intake
- No contact between bulk and air or light, suitable for most sensitive formulas
- Excellent compatibility with most of the bulks

Outstanding dispensing performance

- Precise dosage
- High restitution rate (> 90% of the filling volume dispensed)
- Suitable for formula viscosities ranging from 1 000 to 80 000 cps

Modular and versatile

- Affordable & modular dispenser range
- EVOCLASSIC pump design to pair with tube packaging or glass bottle
- Recyclable in the PP recycling stream even if colored and decorated

TECHNICAL FEATURES

- Top fill snap-on piston airless dispenser
- Straight shape, plastic or metal finish
- Lockable actuator in straight (W6) and rounded (W7) shape
- With already assembled PP clear or separated PP cap
- Certified recyclability by CYCLOS HTP (score 91%)
- Metal free path airless pump Alpha9/150 µl and 240 µl
- Available with new decoration technics like silk foil embossing and digital heat transfer
