Slide into the future

LINER-FREE DISPENSING FLIP-TOP

Liner-Free for Reduced Packaging Waste

Fully recyclable closure eliminates foil liner waste and removal frustration

Closure Tamper Evidence

Safe, non-detachable, visible, audible, and tactile tear band replaces a foil liner

Bottle Tamper Evidence

Slide can be removed to enable higher product evacuation and cleaning before recycling. There is a tactile difference when removing the closure from the bottle.

Fully Recyclable Flow Control Valve

Available with SimpliCycle™ fully recyclable flow control valve technology

E-commerce Friendly

Designed to not open or unthread during transportation

Specifications

- 38-400 or 33-400 neck finish
- 55mm (2 1/8") outer diameter
- With fully recyclable flow control valve or 7.8mm (0.3") orifice

Our technical team is at your service to audit and optimize your filling lines.
