Small but **Impactful**

Flow control is now fully recyclable

SimpliCycle™
by Aptar

Next generation of fully recyclable flow control solutions

Recyclable

- Fully recyclable material with the PP/PE stream
- Allows for easy sorting thanks to use of low-density material, 0.89 g/cm³
- Assessed by recyclers and third-party institutes (Recyclclass, Cyclos, APR, etc.)
- Best CSR/Sustainability initiative by the World Food Innovation Awards (WFIA) and WorldStar Global Packaging Award

Clean & Convenient

- Provides a hygienic dispense with clean product cut off
- Eliminates messy spills and leakage during product use
- Combine with inverted packaging to ensure product is always ready to dispense
- Allows for inverted storage to ensure all product is evacuated from the package

High Performance

- High-quality manufacturing avoids valve deformation
- Compatible with most food and beverage products, including fat- and acid-based products
- Multiple sizes and configurations to dispense a variety of product viscosities
- Ensure quality, consistency and performance reliability from the first dispense to the last

Precision & Control

- Allows consumers to dispense product where and when they want it
- Consistent product flow rate with every squeeze
- Dispenses a little or a lot depending on consumer preferences
