

PRESS'AIR
TECHNOLOGY

COMPRESSED

AIR

The broadest offer of aerosol inserts and actuators
for a consistent and smooth spray until end of use.

PRESS'AIR

TECHNOLOGY

FEATURES & BENEFITS

Compressed Air Technology

- Continuous diffusing powered by compressed air
- Avoids emissions associated with traditional propellants by using air

Stable High Performance

- High-quality spray
- Consistent and smooth spray until end of use
- Upside down dispensing

Enhanced User Experience

- Sensorial spray, no smell of gas
- Muted sound
- Optimum particle size for a soft mist and light sensation

TECHNICAL INFORMATION

- Global manufacturing footprint for a large production capacity
- Mix and match the broadest range of aerosol inserts and actuators, including Twist-to-lock hoodless actuators
- System comprises an optimized valve, an actuator and a specific insert
- No additional industrial investment required on filling lines

Valve	Optimized valve (based on ARM or Ariane Ball valve)
Inserts	All spray inserts
